YouTube Embed Code Script

1. Log into YouTube account
   Go and choose the video you want to embed on your site. Underneath the video you will find controls like the ones to the right.   Click the "**Share**" option button

2. Then choose the "**EMBED**" button

3. Then check the items as instructed below.

   1. If you want your video to play in HD, check the related box.

   2. Make sure "Use old embed code" is checked

   3. Pick the video frame size to use on your page, our maximum page width is 960 px, so
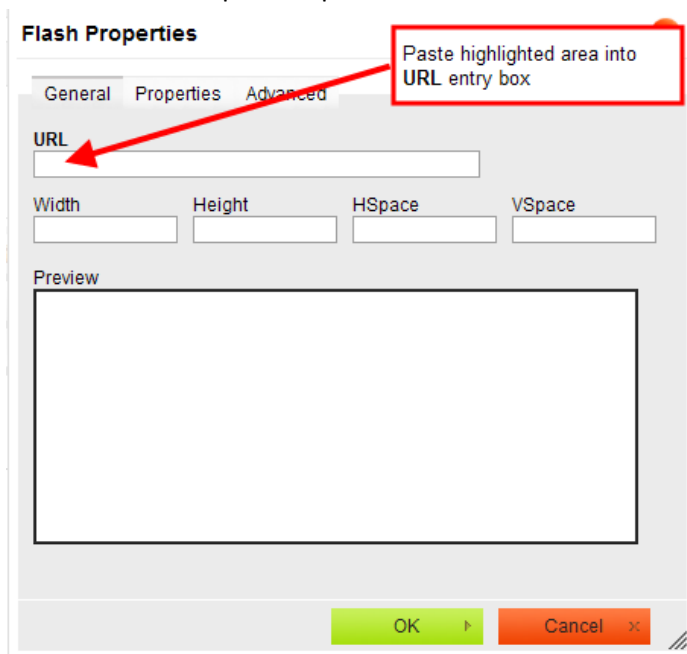

4. Copy the script to a Text editor or Word.

5. Then highlight the portion of the script just after the quotation mark and before "http:…" to just before the ">" character. See example below, the script that is highlighted in yellow is the portion of the script that you will paste into the Flash control within the editor.

<objectwidth="560"height="315"><paramname="movie"value="http://www.youtube.com/v/O_H5QwbGuKI?version=3&hl=en_US"></param><param name="allowFullScreen" value="true"></param><param name="allowscriptaccess"value="always"> </param><embed src="http://www.youtube.com/v/O_H5QwbGuKI?version=3&hl=en_US" type="application/x-shockwave-flash" width="560" height="315"allowscriptaccess="always"allowfullscreen="true"></embed></object>

---

6. Then select the Flash insert button on the Editor menu.

7. Then insert the copied script indentified in #5. Above in the entry box under URL

8. Next click OK
9. Then SAVE the page and your YouTube video should appear on the page.
